Best Facial for Congested Skin

PORCELAIN FACE SPA

Quintessential Facial, \$250 with a therapist; \$435 with a Director Aesthetician, per session

The efficacy of the Quintessential Facial lies in its intensive extraction session, where each pore is carefully worked on before your aesthetician layers on a custom-blended facial mask. But the pain is completely worth it as skin is clearer and more even-toned in a week.

KEY BENEFITS Why you should do this.

■ **LESS DIRT**

The treatment ensures the skin is thoroughly cleansed, leaving no room for dirt to cause skin congestion.

■ **LESS SENSITIVITY**

The treatment also helps in making tricky skin types less sensitive. This prevents future breakouts from happening.

■ **LESS OIL**

The Quintessential Facial prevents repeat breakouts by reducing the production of sebum. The result? Skin is less oily.

Quintessential Facial is \$250 with a therapist and \$435 with a Director Aesthetician, per session. For more information, visit www.porcelainfacespa.com

For those with less than perfect skin, generic facial treatments are not enough to address specific skin concerns. In some cases, they can even aggravate the situation—even incite another bout of breakouts.

The only way around that is to go for a facial that specifically targets the problems found on congested skin.

Unlike other treatments, the Quintessential Facial was designed to alleviate the problems that come with severe skin congestions, acne and combination skin. What makes it so effective at this is Porcelain's intensive extraction practices. Together with its selection of ampoules, serums and tonics, and its custom-blended intensive-treatment facial mask, it helps clients deal with their individual skin concerns. From brightening dull skin to lifting and firming, this treatment has got it covered. Other benefits from the facial include cell renewal, improved collagen production and lighter acne scars.

But the thing that really differentiates the Quintessential facial from the rest of the pack is an individual prescription of the type of equipment used after the mask. Choosing from a selection of seven different machines, the treatment is guaranteed to be effective because it is customised to what you need. This isn't another cookie-cutter treatment.
